

We believe in
Reuse, Reduce and Recycle.

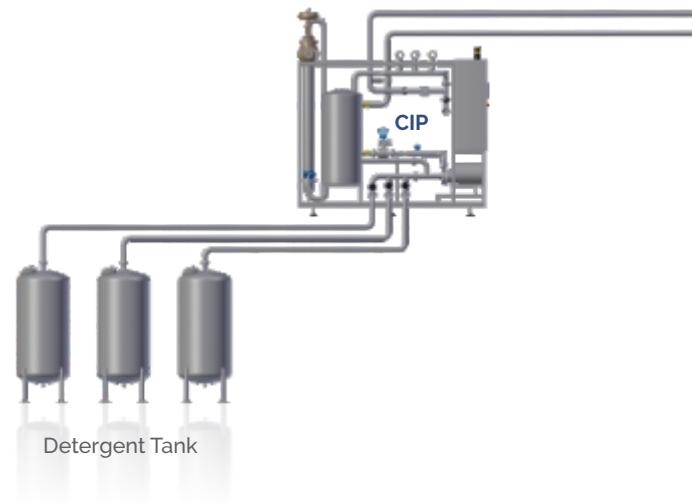

unique
Automated CIP

distribution of CIP piping

Process expertise is a key requirement for proper CIP & product piping. Using the design templates our system design & process engineers study your plant, and ensure hygienic piping design without dead ends and eliminate chances of intermixing CIP solution with the product. Proper CIP distribution piping is a key part of a successful [CIP Cleaning System](#).

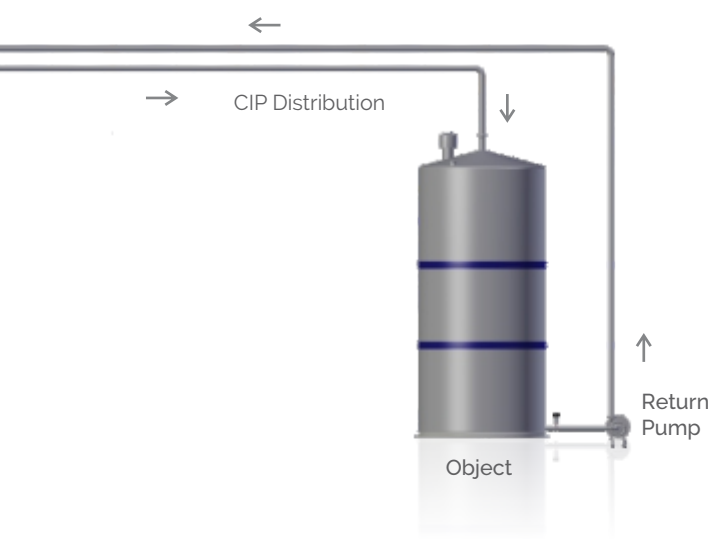

automated CIP module

Being globally preferred [CIP system manufacturers](#), we manufacture CIP Module that is factory tested & designed to suit customer requirements. All the CIP requirements like controlling the various parameters such as CIP flow, the temperature of media, contact time and concentration of CIP solution are achieved by this equipment. The modular construction & proven technology helps for easy integration reducing installation and commissioning time.

Design compliance with FSSAI & EHEDG requirement

our system advantages

- | Fast payback of the investment.
- | Reliable Components.
- | Modular design & easy integration with existing System.
- | PLC-based fully automated CIP station.
- | Controls all important parameters like time, Temperature, flow, and concentration.
- | Lye, acid, and water steam consumption is optimized.
- | Meets the hygiene requirement in the food industry.
- | Easy for operation & independent of operator skills.
- | Flexible for expansion & connectivity with various Automation system.
- | CIP of Aseptic equipment.
- | Remote support for troubleshooting and service support.

why automated CIP

- | Improves the product quality, which results in fewer market complaints.
- | Improves the equipment's performance.
- | Operating Automated CIP is independent of operator skill.
- | Reduces environmental load.
- | Electricity saving, water saving and manpower saving.
- | All processing equipment and piping are cleaned centrally, ensuring highest hygiene level
